Textile antistatic agent

Product Introduction:

The appearance of this product is colorless to light yellow liquid, specific weight: 1.02 g/cm³, resolve temperature:150°C. It can be dissolved in water easily and stably. It is a copolymer of cation monomer dimethyl diallyl ammonium chloride and nonionic monomer Acrylamide. It has cationic, high molecular weight, charge neutralization and strong sorption, which can be greatly applied to eliminate static electricity in spinning the polyester, polyacrylonitrile, polypropylene fibre, polyacrylonitrile fibre, polyester/cotton and other blended fibre. It also can be used in dyeing and finishing, speeding up the emission of the charges effectively on fabric and consequently reduce the static electricity and have multiple antistatic effect. Simultaneously, improving the fabric workability and wearing harmoniously.

Specification:

Code	LYPF-324
Item	
Appearance	colorless to light yellow liquid
Solid content, %	35±1
PH	5.0-7.0
Viscosity(25°C),cps	8000-12000

Use:

This product is used in dyeing and finishing and eliminating static electricity in spinning the polyester, polyacrylonitrile, polypropylene fibre, polyacrylonitrile fibre, polyester/cotton and other blended fibre. Please take a test to confirm the correct method and dosage.

Package& Storage:

125kg PE Drum, 200kg PE Drum, 1000kg IBC Tank.

Pack and preserve the product in a sealed, cool and dry condition, and avoid contacting strong oxidants.

The term of validity: Two years.

Transportation: Non-dangerous goods.

Attention:

- (1)Your wise advice about our products will be appreciated to improve our qualities and services.
- (2)There is no fixed pattern for application technology, therefore, the customer should base on your own technology and the equipment conditions to execute the program and utilize the product.

Our Promise: Sincere Business, First-Grade Quality, First-Class Service and Double Win.
